ISOBUS Test Center - Trusted agrirouter Certification Partner

ISOBUS Test Center (ITC) is a trusted partner of DKE-Data GmbH & Co. KG for the certification of agrirouter Communication Units (CU). Every CU used to connect to the agrirouter requires a certification. The certification process checks whether the CU meets DKE's minimum requirements for agrirouter equipment.
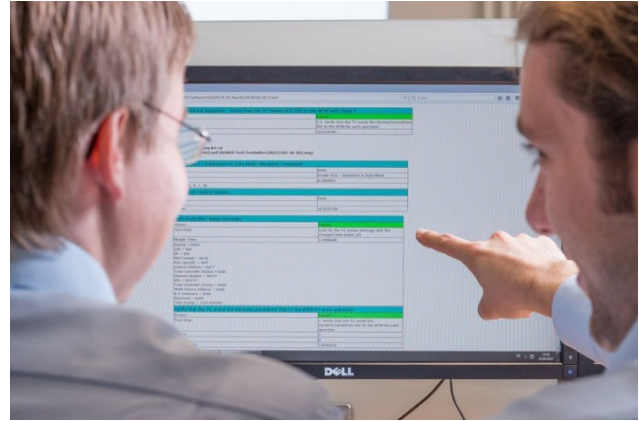

ITC is one of only five test laboratories in the world accredited by the AEF for ISOBUS certification. We have extensive experience in testing ISOBUS hard- and software and are thus an ideal partner for DKE and its clients.

Our Services

- Certification and Re-Certification of agrirouter Communication Units
- ISOBUS certification based on ISO 11783 and the AEF ISOBUS functionality Guidelines

Certification Process

1. You register your Communication Unit in the QA environment of the agrirouter website
2. You contact us with the required information
3. ITC provides an offer
4. You place your order and request a test date
5. ITC carries out certification tests providing detailed error analysis
6. You register your Communication Unit in the production environment of the agrirouter website
7. ITC issues agrirouter certificate
8. DKE activates your CU on the agrirouter
